

**Accessories for AXIS M1011, M1011W and 1031W**

Short after the launch from the M1011/1031 series we are able to offer a full range of accessories for these models. Some of them are taken from the 206/207 series, some of them are new and special made. One of them is our brand new protection housing series. In the next month we will still continue to advance this program.

**Protection housing for M1011, M1011W and M1031W**

Introducing the new protection housing with a lot of new features.. One of them are the frontglas. In this housing we build in a thin and smart looking glas with a aluminium ring. The glas is optical clear and got an UV-block coating. This brings a better colour quality. Also the diameter is bigger so you can use wide angle lenses. Camera mounted from the backside **IP 65**  
 Possibel is also now to mount a heater fan kit into this modell also.

**Modell 6206**  
 Also you can use the wireless option from this modell because the housing is plastic.

**Modell 6207**  
 massive wallmount with balljoint mounted directly to the housing with covered cable channel

**Available Versions:**

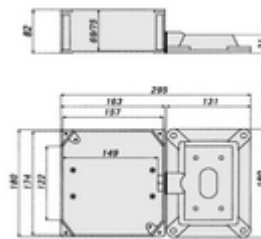

- Modell 6206 protection housing IP 65 without heater. UV block frontglas, cameramounting and 2 PG cable outlet on the back
- Modell 6207 same housing like 6206 in addition here you have a wallmount with covered cable management
- Modell 6209 protection housing with build in heater , fan and power supply. Housing can be connected to input power from 90-230VAC electronic controlled heater and fan. UV block frontglas and 2 cable outlet on the back
- Modell 6209/WM same housing like 6209 in addition here you have a wallmount with covered cable management
- Modell 6205 protection housing 6202 with build in PoE splitter
- Modell 6205/WM same housing like 6205 in addition here you have a wallmount with covered cable management
- Modell 6206/SA housing with build in Lilon battery back. Different runtimes available

Modell 6206/M10 housing with rugged connector box . Here you can build in any kind of electronic like power supply, optical converter ect.

**Modell 6208/M10**

- options: build in heater/fan
- build in PoE splitter

**Please note. that the AXIS M1011/1011W and 1031W haven't an iris controlled optic. If you are using it outdoor it could be that in bright sunny conditions you may have over blooming areas in the picture.**

### Vandal proof domhousing

In the past we also got many request about a vandal proof type. Now , here it is. The camerabody is aluminium, the glas vandal proof. It is possibel to mount in the camera with all types of different lenses. A real benefit is, that ist is also possibel to build in heater and fan . The housing is IP 66. You can mount it direct to the wall /ceiling or to our adjustable mounting.

**Modell 6100**

The camera can be adjusted in different angles.

Can be used with our adjustable wallmount Nr.: 10100

### PoE solutions

Integration the AXIS 2076/207 ,207W or 207MW in a PoE network is now very easy and inexpensive. The mounting kit for these modells includes a adjust and fixable wallmount, integrated PoE splitter with connecting cables and a camera mount .

PoE iniector are not includet

**Modell 6210**

### Batterv packs

to make the camera working totally wireless we offer a LiloN accupack with camera mounting. Also you get a snap in mounting to mount and release the pack very easy. The basic modell is working up to 8h. Also we offer accupacks with longer livetimes or accus which are build into our housings

**Modell 6200**

## Infrared set

Since 1995 we manufacture Infrared solutions for use in hospitals. Even for the new M1011 series we can offer an infrared kit. So this camera delivers you than a sharp and noiseless picture in total darkness. With the kit you get housing, special infrared optic, infrared illuminator (up to 8 m by total darkness) and a power supply. Also you can use the wireless option from this model because the housing is plastic.

The camera is covered behind a, for human eye invisible IR filter

### Modell 6204

**OPTIONS 6204:**  
waterproof version  
built in PoE splitter  
accupack

Modell 6204 /Waterproof

## Animal observation camera

No, not a joke. Yes we have a camera which is special made for use barnstable or for the chemical industry and indoor swimming pools. Aluminum housings did not live long in this rugged conditions. Ammonia, chlor and other nice stuff damages the housings. This special plastic material resists this. The housing is IP 68. The shown kit have an infrared illuminator and a built in 12h accupack. The wireless option can be used because the housing is made of plastic.

Why to observe pigs and cows and horses? Sometimes it is more interesting than the TV program, no, if you have sick, pregnant animals and a big farmstall so there is no need anymore to have a look to them sometime a night. With this system you, the doctor or the owner from the animal can have a look what's going on. With the wireless, infrared and accupack you are totally independent to move the camera around every day, from box to box. You can switch of the light, because this camera works in total darkness.

### Magnetic Wallmount

for easy installation on metal. You can switch ON and OFF the magnetic power. No battery or power supply needed. On steel it can hold up to 60Kg. Models with up to 100 Kg are also available

Indoor use only

### Modell 10900

## Optics

With our converter kit you can use different models of optics with this camera. Here you can see the different angle of view.

16mm optic
