Battery pack with build in PoE Splitter

Special for installers or service personal we made the new accupack with build in PoE splitter. On construction areas often you do not have power or network connection. Therefore it is difficult to test or adjust the cameras. With the accupack, which comes with a belt, you can power PoE systems till IEEE 802.3at, means High PoE. The runtime from the basic version is 4-6 h.

In addition you can use a TFT monitor like for example AXIS T8412 or a laptop
