

Replacement kit für AXIS Q6032-E

Using the Q 6032-E from AXIS you face the problem, that the view in horizontal position is only possible with a failure in the picture sharpness. This grounded on the original domglas from AXIS. To get a sharp picture also in horizontal camera position we offer a domglas replacement kit.

this picture are taken with original glas , so you can see the unsharp area.

same picture with our replacement glass, now you can read the Pack.Nr.clearly

Above livepictures from original cameraglas AXIS Q6034

with Adapterglas

6032 with new glas,
