

Color your cam

Grey, grey and grey... most cameras coming in the same color. To fit the camera to the facility design is sometimes a problem. Most you have to disassemble the camera, than you have to choose the tight color and the right color quality, last you have to assemble the camera and check if all is working fine.

We offer all in one. Not only that you can order our housing as an option in your color also we offer a service if you send us your camera .

We make a high quality painting on plastic parts or powder coating on aluminium. So you can be shure, that the color will be UV protected and abel to be outside for a long period of time.

Here are some expamles from painting we did in the past

AXIS 225 powder coading

AXIS 216 in 3 different colors

AXIS 225 and pendat kit in the same color

domhousing IP 66 in dark grey
