

Panasonic IP-cameras for E.ON water power in Bavaria

E.ON one of the biggest power companys choose PANASONIC network cameras for their water power plants in Bavaria. Starting with the HCM 280 in 2004 now the next generation HCM 580 been used for this long time project. As you see, there is no problem for PANASONIC network cameras be updated with new products. New and "old cameras working together in one net without problems. For the hard outdoorconditions E.ON choose our IP 66 full aluminiumhousing. One of the reason E.ON took those is, the high quality and the full equipped and wired housing makes the installation fast and easy. Over the years there will be no problems with cameras or outdoorerequipment , so we look forward to continue this success story..

Here are some pictures of the cameras,
