

**NEWS Update 07/2009**

On the Security show in Amsterdam we launched our new outdoorhousing for the AXIS M1011/M1031 series with great success. This model is available in various versions so you can have it now also as a heated version with the AXIS PoE splitter inside. Special the new benefits from this system, that you have no screws in front, the new UV-glas, the easy mounting with the backplate and the possibility to mount into the housing the power supply or a PoE splitter get a good feedback from our customers.. Now we introduce 2 new products, the housing with light (entrance control) and the new MEDIC III infrared system.

At the AXIS booth in Amsterdam

Water proof housing with white light LED spot  
For use in entrance control ect. You can switch ON/OFF the light over a movement or light detector.

**MEDIC III**

A camerasystem with a long history. The first models came out in 1994 with analog cameras for use in sleeplabs. With the AXIS 206 and 207 we get a IP version. With the M1011/M1011W we now also offer a solution in the new design. The camera is covered behind a ,for human eye , invisible black filter. So no one can see the camera behind. You will get with this system clear and sharp pictures at 0-Lux conditions. In the set you also get the special Infrared lens, the build in infrared illuminator, housing, IR filter and cameramounting. You can supply it with a standard power supply or over a build in PoE splitter (option)

room, 0-Lux, distance 6m

**Stainless steel housing for AXIS 216/212**

As a new part in our stainless steel program we introduce now the new mini dom housing for AXIS 212/216. This rugged housing is IP 67 . It is available with a heater or build in PoE switch. The housing material is stainless steel with a 5 years warranty against salt water. So you can use it on ships, oil platforms or harbour areas. Beside all this, it looks really cool.

**Infrared Illuminator with PoE**

our illuminator series MIRALL is now also available with build in PoE switch. Beside different infrared LED's with angles from +/-8 to +/- 75 degree now you also can choose from different power supplies like +12VDC, +24VDC or PoE. Also with the build in PoE switch the dimensions are still 200x100x30mm

**Lens adapter Kit for AXIS M1011/M1011W and M1031W**

we offer may different modells os lenses for the AXIS 207/207 series. So many customers asked us for a simular solution regarding AXIS M1011 series. It wasn't so easy like for the AXIS 207 series but now we can offer a mounting kit for the new cameras. Now you have to build into the camera the new lens mount and than you can use all kind of different optics.

Lensadapter

35mm lens

standard lens

2.6mm lens

3.6mm lens

6mm lens

16mm lens

**Latest update**

just finished , M1011 housing, heated with build in AXIS high PoE ..... Now available.....
