

**INFRARED ILLUMINATORS MIRAI Series**

Full aluminium illuminator for indoor use. Available in different sizes. You can choose also the type of LED input currency and the way you want to control the illuminator. More information you will find on the homepage.

**Infrared illuminator BASIC**

Small and lightweight indoor illuminator. Available in black and white. With special mounting adaptor you can mount it on AXIS 214 or SONY D70. Also available with build in Microfon.

**PoE Set for AXIS 206/207/207W and 207MW**

Basically if you want to install these cameras to a PoE net you need a splitter. So you must mount 2 parts. This unit is a wallmount with integrated PoE splitter. The camera can be connected directly to it. So finally you just have to mount 1 part which saves time and look nicer.

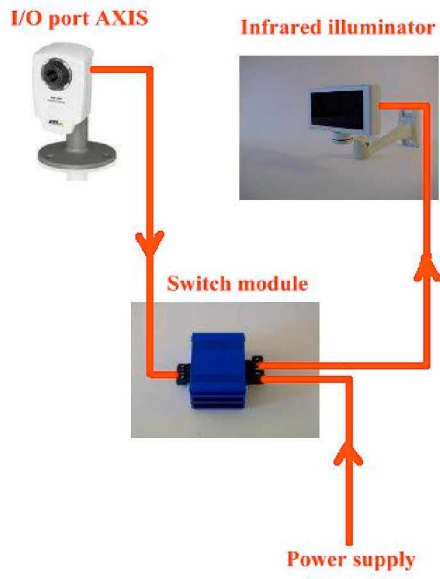

**PoE kits for this cameras are now also available as build in part for our outdoorhousing and the infrared unit.**

**High Power PoE for domhousings**

High power kits for all our dom housing modells are now available. The unit have a output power from 12VDC/3,5 A. So heater, fan and camera can be supplied over one network cable.

**SWITCH.module**

To control other electronic devices over the camera I/O port we now offer many switch boxes. Available for 12VDC and 5VDC. The board can be delivered in indoor /outdoor housings or just as a pcb. A special model which can be directly mounted to the 207 will be shown on the Essen Security show
