

PoE Wallmount for AXIS M1011/M1011W and M1031W

By using a PoE network you still have the problem, that you need beside the camera also a PoE splitter which you have to mount close up to the camera. We now offer a wallmount with a integrated PoE splitter. The camera can be adjusted over a balljoint. All is wired and ready to use, you just have to plug in your network cable.

Fits also for AXIS 207/207W and 207 MW

Ordernumber: 6210

IMPORTANT NOTICE: The 6210 comes without a PoE injector. The injector has to be ordered separately

Ordernumber injector: 6210/inj
