

Accessorie and ADD ON's for AXIS 209

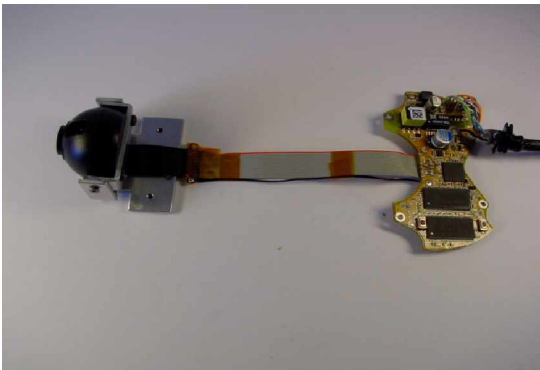

Wallmount:

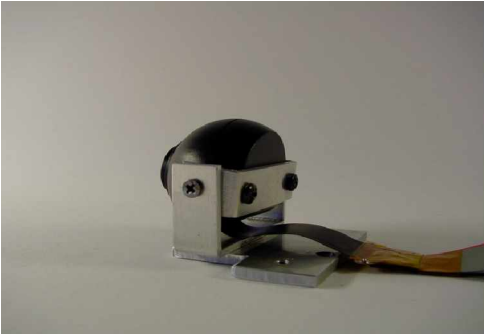

Massive full aluminium wallmount with fixable balljoint and special mounting plate for the AXIS 209.
Usable indoor and outdoor

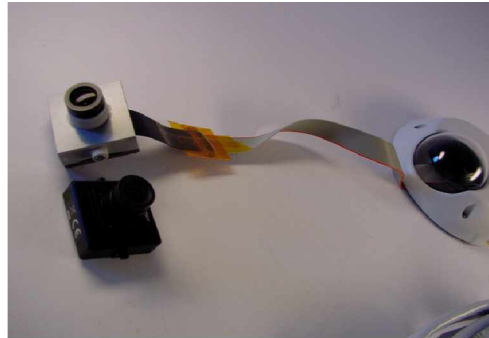

Gooseneck for AXIS 209

For special applications it is a need to lenght up the cables between mother board and image sensor.
The longest cable we made was 20 cm so we are at a total, incl. original cable, from 25 cm.
Also we make holders for camera head or new designed cameraheads.

Special holder for original camera head, fixable cameraposition

New camerahead for AXIS 209. Here we have to copy a analog camerahousing to replace it 1:1 with the 209.

Various optics for this camera are available.

NEW! Magnetic mounting for the 209

for temporary quick installations on metall parts, like police cars or ships we offer a magnetic foil. This will be fixed to the camera with a double sides tape. Different foils with more or less magnetic force are available
